PROJECT WORK

Job Portal

- Designed a **Job Portal** using **HTML, CSS, ReactJS, NodeJS, ExpressJS** and **MongoDB database** connecting HR professionals and candidates.
- Uses the **bcrypt library** to hash a user's password with a cost factor 10 which replaces the user's original password with the generated hash for secure storage.
- HR professionals can create job listings, applicants can apply for those jobs. Then HR professionals can thoroughly review applications and make informed decisions. After that applicants are informed about the outcome of their applications.

Entertainment Hub

- Developed an innovative **Entertainment Hub** website using **HTML, CSS, JavaScript**, and **Firebase database**.
- Provided diverse services, including games, music, movies, news, jokes, and memes.
- Premium features like todo lists, quizzes, chatroom and blogging, accessible after a quick registration process.
- **Integrated APIs** for movies, news, jokes, and memes.
- Utilized Firebase for seamless signup, login, contact functionalities, and chatroom, todo list and blog services.

Jarvis (Voice Assistant)

- Developed voice assistant 'Jarvis' using **HTML, CSS**, and **JavaScript**.
- **Integrated Web Speech API** to enable speech-to-text and text-to-speech conversion.
- Implemented voice-controlled features, enabling task execution through natural voice commands.
